

$$\frac{7}{\sin 21,6^\circ} = \frac{x}{\sin 32^\circ} \Rightarrow x = \frac{7 \sin 32^\circ}{\sin 21,6^\circ} \approx 10,08$$

$$\sin 53,6^\circ = \frac{h}{x} \approx \frac{h}{10,08}$$

$$\Rightarrow h = 10,08 \cdot \sin 53,6^\circ \approx 8,11 \approx 8,1$$
