

$A = \frac{B+b}{2} \cdot h$

$h = ?$

(1) points to $B+b$
 (2) points to denominator 2
 (3) points to h

$\div h$

$$\frac{A}{h} = \frac{B+b}{2}$$

$$\frac{h}{A} = \frac{2}{B+b}$$

A

$$h = \frac{2}{B+b} \cdot A$$

$$\frac{A}{B} = \frac{C}{D}$$

$$\frac{B}{A} = \frac{D}{C}$$

$$\frac{1}{3} = \frac{7}{21} \Rightarrow 1 = \frac{7}{21} \cdot 3$$
